# Integrability of Continuous and Discrete Evolution Systems

**Thursday 13 December AM**                                    CO 216

9.50–10.15    Reinout Quispel
              *Discrete Integrable Systems*

10.15–10.40   Willy Hereman
              *Symbolic Computation of Conservation Laws of Nonlinear PDEs
              in $(n+1)$-dimensions*

11.00–11.25   Mark Hickman
              *Leading Order Integrability Conditions for Differential-Difference
              Equations*

11.25–11.50   Gerrard Liddell
              *American Barriers*

11.50–12.15   Ernie Kalnins
              *Integrability and Separation of Variables*
